Denotes confidence level of 90% to 95%
Denotes confidence level above 95%

*Table created using 94 courses with a perfect or near perfect response rate from Spring 2007 to Spring 2010

For Example:
In a class of 12 students, of whom 7 responded, where the mean rating on a question was 4.1, there is a 96% chance that the actual mean is between 3.7 and 4.5 (+/- 0.4).

If 7 students in the course had responded to that question with a mean rating of 4.1, there is a 46% chance that the actual mean is between 4.0 and 4.2 (+/- 0.1).

Created on July 3, 2010
